THE PERTILISER

Size matters? Not when it comes to derrières, as long as it's pert and shapely it will look hot whether big or small. Non-invasive VelaShape treatments have been a useful tool to help contour the body, but the new, more powerful VelaShape II gets significant results in far less time. Dr Ariel Haus, who has been using it to sculpt perfect bottoms in Brazil, is now poised to beautify butts in the UK. Bi-polar radio frequency heats the tissue up to 20mm deep to increase circulation, then mechanical massage is used to break up cellulite. Finally, infrared light heats the tissue up to 3mm deep to stimulate collagen reproduction. It may sound like something from *Star Trek* but there's no accounting for the lengths we'll boldly go for a pert behind.

VelaShape II from
£150 per session
(six recommended)
