DR HAUS COMBATS SIGNS OF AGEING WITH UNIQUE SKIN REVITALISING TREATMENT – RESTYLANE VITAL

One of London's leading cosmetic doctors; Dr Ariel Haus, an expert in anti-ageing is delighted to announce his support and use of Restylane Vital in restoring skin vitality whilst combating the signs of ageing. Treatments are available now at Dr Haus' Harley Street clinic and all treatments result in skin looking and feeling both smoother and more toned.

Creams and moisturisers simply cannot combat signs of ageing or nurture the skin in the same way that Restylane Vital does. Promoting the production of healthy skin by balancing the nutritional environment of the skin at cellular level by attracting and releasing water when needed, Restylane Vital boosts skin elasticity leaving it looking smoother.

Skin condition is evidently improved and the lustre restored. Examples include prominent veins and sun damage on say the backs of hands; Restylane Vital combats the combined effects of ageing eliminating the visible damage.

As with all of Dr Haus' treatments- Restylane Vital is clinically proven and used by him in a safe environment. A recent clinical study in

Germany demonstrated that Restylane Vital improves skin elasticity and decreases skin surface roughness. The results are smoother, firmer, toned, healthy looking skin with an overall revitalised appearance.

The procedure is simple, pain free and quick. Targeting a broad range of areas from face, neck, hands and the area between the neck and breasts, it replenishes the Hyaluronic acid lost through ageing. The skin is hydrated and the elasticity and tone are improved. A very small amount of Restylane Vital is injected into the deep dermis about 1cm apart.

Once injected it flows smoothly and is distributed evenly in the skin. Lasting a period of months the Hyaluronic acid is completely broken down within the skin. Depending on age repeat sessions are recommended every four to six months.

With a proven track record spanning over 12 years and over 10 million treatments worldwide, Restylane is a safe market leader in anti-ageing which is entirely non-animal derived.

Says Dr Haus; 'I have seen an increase in patients

seeking a variety of anti-ageing treatments and Restylane Vital delivers optimal results. With its ease, safety and guaranteed results it is now one of the most popular treatments I perform for patients seeking radiant and healthy looking skin. If you have skin problems or issues with say the shape of the nose or lips then this is a treatment that works. Above all my patients feel new and leave the clinic with a new air of confidence and a glowing look.'

Dr Haus also offers all manner of non invasive treatments at his clinic including; VelaShape, Chemical Peels, Intradermotherapy, Anti Wrinkle Treatments using Botulinum Toxin, Dermal Fillers, Triniti Emax, Starlux, Thermacool, Accent, Crystal Peeling and Laser Depilation.

For that radiant, revitalised look head to Dr Haus' clinic in London.

Restylane Vital treatments start from £350.00 for one area
