

DR ARIEL HAUS Invites You To Glow With A Skin Peel

One of London's leading cosmetic doctors, Dr Ariel Haus, an expert in anti-ageing is encouraging all Londoners to get a new glow in time for 2011 by experiencing a mainstay of medical skin treatments that has been around for more than a century – the

skin peel. Whether you have sun damage, acne-prone skin or blocked areas on your face, a skin peel will give you a totally fresh, clean and new glow.

We all have excess skin cells on our faces

which over time become dry and give us a dull and somewhat lifeless complexion. With a skin peel this can change instantly. No longer a treatment that requires endless downtime, a skin peel today is gentle and results in complete skin rejuvenation.

Dr Haus performs a selection of skin peels designed for different types of skin. Crystal Peeling is particularly popular. A crystal peel helps reduce the effects of dry skin, fine lines, pigmentation and scars. The result is softer, smoother-looking skin that glows with good health. Crystal peel microdermabrasion is a mild peeling technique that uses a controlled stream of fine crystals, which are directed onto the skin's surface to exfoliate and stimulate new cell growth.

The tiny particles of dead skin are then vacuumed away with the crystals, improving skin clarity, minimising blocked pores and creating a glowing effect. Microdermabrasion is an excellent procedure for freshening the skin for a special occasion.

Skin peels are an ongoing part of a skincare regime and Dr Ariel Haus recommends regular peels.

Says Dr Haus; 'If you want clearer, softer and hydrated skin and that ultimate glow then try a skin peel- I have been doing them for years and all my clients leave with a new appearance and they feel radiant- furthermore, the procedure is quick and pain free.'

Dr Haus also offers all manner of non invasive treatments at his clinic including; VelaShape, Chemical Peels, Intradermotherapy, Anti Wrinkle Treatments using Botulinum Toxin, Dermal Fillers, Triniti Emax, Starlux, Thermacool, Accent, Crystal Peeling and Laser Depilation.

For a new glow head to Dr Haus' clinic in London.

ABOUT DR HAUS

A cosmetic doctor from Brazil, Dr Haus has carried out advanced training in Dermatology and Aesthetic Medicine and also practices Anti-Ageing Medicine. Registered as a medical practitioner in both Brazil and the UK where he has clinics, Dr Haus only carries out non-invasive treatments and has extensive experience using laser therapy to reduce wrinkles, improve skin elasticity and to remove unwanted hair and fat.
